

Tec promotes health with the launch of a new campus

Tec de Monterrey has announced the Health Sciences Campus, which will provide health care to high standards of quality and safety.

This was highlighted by **Guillermo Torre**, Rector of **TecSalud** and Vice President of Research, during the launch ceremony.

He remarked that it will be the first private Academic Health Center in Mexico and Latin America, which will incorporate the **teaching of health professionals, offer medical care, and scientific research facilities.**

The new campus will include the **Zambrano Hellion Hospital** (which will be expanded), the **new site of School of Medicine and Health Sciences**, and **eleven research institutes and laboratories.**

Per **TecSalud's vision**, Torre noted that the campus' **impact is not limited solely to the institution** but extends throughout the country and will shift the current health care paradigm.

*“If we become **leaders in care and teaching**, others will want to emulate us. That will lead to a **multiplier effect**,” Torre said in an interview with CONECTA.*

A space for science and advanced medicine

The **Health Sciences Campus** will house the new site of the **School of Medicine**.

There will be two buildings covering over **30,000 square meters**, which will house more than **thirty classrooms and twelve laboratories**.

Completion of work on the new School of Medicine site is planned for the **second semester of 2026**.

Torre emphasized that **beyond having physical spaces equipped with technology**, it is **important that talented people will be able to work together**.

*“The most important part, **learning**, will happen because three groups (students, doctors, and researchers) will be **in the same environment** and working on solutions to the same problems.”*

Expansion of the Zambrano Hellion Hospital

As part of this project, the **Zambrano Hellion Hospital** will undergo changes in its infrastructure which will result in a **50% increase in its care provision**.

The expansion project includes:

- **An increase from 6 to 8 operating theaters**
- **It will go from 115 to 179 rooms.**
- **The number of consultation rooms will increase from 203 to 295.**
- **The number of beds will go up from 110 to 179.**

In addition, three floors of offices in the existing tower will be refurbished to house the **Institute of Digestive Health, the Institute of Cardiology, and the Institute of Surgery.**

According to the plans shared, this **evolution of the hospital will not affect its operation**, as the expansion will be focused on **improving the efficiency, quality, and capacity of medical specialty services.**

Expansion work at the Zambrano Hellion Hospital is planned to be completed in **the first quarter of 2025.**
