

CONECTA, the official news site of Tec de Monterrey

Tecnológico de Monterrey has launched its new official news site, CONECTA, where it will publish the most important stories about the institution and its community.

CONECTA will be hosted on the **Tec's official website** at the following address: <http://tec.mx/noticias>. It will focus on **outstanding stories of academic, sporting, and cultural achievements by academics, students, graduates, and the university itself.**

CONECTA previously only existed on an Intranet site that could be accessed by Tec students and collaborators. As of 2018, **it's a site which is open to the public that will substitute the institution's former Information Website.**

In this new phase, CONECTA was fully redesigned to present **a version that is agile, responsive, and adaptable to any digital device, displaying high-quality graphics, photo albums, and videos.**

On CONECTA, you can browse by **general information categories (Education, Research, Sports, Business, Health, Art & Culture, as well as Connection and Prestige).** You can also **find information from each of the 26 campuses and/or 7 thematic schools of Tecnológico de Monterrey nationwide.**
