

She finished her master when she was 16. Now she's going to Harvard

Andrea López | Tec Review,

Dafne Almazán Anaya has become the **first Mexican minor** to be **admitted** to a **postgraduate course** at **Harvard** and the **first person under the age of 18** to start a **master's degree** at that university **in 100 years**.

Dafne, 17, is beginning her **second master's degree**, this time in **Mathematics for Teaching**, at this American university.

She is gifted. In 2017, when she was 16, she completed her **Master's Degree in Education** with a Specialization in Teaching-Learning Mechanisms at **Tecnológico de Monterrey**.

She'd finished high school by the age of 10 and graduated with a **Bachelor's Degree in Psychology** from **TecMilenio** at 13.

“My plan is to design models for teaching mathematics to kids identified as intellectually gifted. This is actually one of the areas the postgraduate course focuses on,” she said in a press release.

The young woman **anticipates graduating in May 2020**, i.e. at the age of 18, which would **make her** one of the **few Harvard University students to have reached that level** at such a young age.
